

I am writing to ask that you do not make any changes that would change the Indiana's telephone privacy law. I signed up because I was tired of getting numerous calls a day about products I don't want. The way I look at it, if I want it, I will search them out. I constantly had hangups on my answering machine from them, my caller id would be full of them and I was sick of it. I enjoy knowing that when I answer the phone, it is generally somebody I want to talk to. I don't like being rude to people, but I was getting so many sales calls that I had become that way. I would lie to them to get them off the phone, I did not like for my sons to see that, but when you keeping getting so many, you finally become that desperate. So I am aksing to please leave our privacy law alone. Thank you.
